Can I use PIXIE to control my projector screen?

Integration · https://pixiepartners.com.au/support-docs/can-i-use-pixie-to-control-my-projector-screen/

Yes, using the PIXIE Blind and Signal controller as a dry contact output device/ or a direct 240volt connection.

Check with your electrician and the projector screen supplier for confirmation of what is required.

This works for most projector screens available.
