Breezeway™ Powerlouvre™ Windows work with PIXIE blind and signal controller

Using the PIXIE Blind and Signal Controller to provide, control either directly or via their interfaces of the Powerlouvre™ louvered windows, you have complete OPEN STOP CLOSE control, 24/7 day scheduling voice control, on wall control and app control.

Importantly this is range is low voltage 24V DC current and should NOT have mains power connected.

There are various methods this integration can be performed using the PIXIE blind and signal controller.
Read the Electricians Guide.
