Does PIXIE work with Rollease Acmeda blinds?

Blinds · https://pixiepartners.com.au/support-docs/does-pixie-work-with-rollease-acmeda-blinds/

Yes. PIXIE works with both 3-wire Rollease Acmedia and 4-wire motors for roller blinds, curtains, awnings, Venetian blinds and more.

PIXIE provides multiple ways to control Rollease Acmeda enabled and 4-wire controlled blinds, including:

- - From the PIXIE and PIXIE PLUS Apps
- - From the PIXIE Widgets on iOS and Android
- - Using PIXIE Schedules
- - From any wall plate using PIXIE Multifunction controllers
- - Using voice assistants when the PIXIE Gateway is installed.

This is achieved using the PIXIE Blind and Signal controller from PIXIE (part#: PC206-BS-R-BTAM)

This device can directly drive Rollease Acmeda 4-wire motors directly, and using the interface device and the PIXIE Blind and Signal controller, PIXIE can control Rollease Acmeda (3-wire) motors too.

The following wiring diagrams, installation and setup documents provide you all the information needed to control your Rollease Acemda® enabled blinds.
