What automatic blinds does PIXIE work with?

Blinds · https://pixiepartners.com.au/support-docs/what-automatic-blinds-does-pixie-work-with/

PIXIE works with a wide range of automatic / motorised blinds, awnings and curtains. This includes most 3 wire and 4 wire versions.

Somfy

PIXIE's Blind and Signal controller has been designed to work 'out-of-the-box' with the full range of Somfy® enabled blinds either via the Somfy® interface device (DCT2RTS) or controlling the automatic blind motors directly using 240volt (4-wire control). Click here to read that FAQ.

Notice from SOMFY April 2025

The DCT2RTS 5 Channel Interface has been discontinued in Australia.

1810334 1 CHANNEL BUSLINE TRANSMITTER $361.96 RRP GST inclusive plus freight.

Rollease Acmed

PIXIE Blind and Signal controller also works with Rollease Acmeda dry contact interface module. Click here to read that FAQ.

MORTIZ FROM NO BULL

PIXIE Blind and Signal controller also works with a range of NO BULL Blinds both using wires and wireless blinds and curtain controllers from their range. Click here to read that FAQ.

- - Model MOF45S-V2-6/28
- - MOF45R/B-V2-6/28
- - Model MOCU/RTS-75W

These are the specific model numbers tested by PIXIE engineering and MORITZ can advise if these motors are part of a larger family which operate the same way for compatibility.

The wireless versions require the MORITZ wireless transmitter - 1 per motor - as well as the PIXIE PC206BS/R/BTAM Blind and Signal controller (again one per motor)

Ask your electrician or systems integrator for more information about integrating PIXIE with your automatic blinds.
