	Primary PIXIE Module Part #				
SDD300BTAM	**BLUETOOTH SMART DIMMER 300W / 250VA LED - GEN3** Compact form factor allows for up to 6 Gang dimming wall plates Superb visual comfort with adjustable fade rates for scenes andschedules with soft start / stop as standard. Selectable LED indicator colour (Blue or Amber) and intensity(HighLight / LowLight) based on dimmer state Used for dimming LED lighting, tungsten & halogen. Not suitable for iron core ballasts/transformers 250VA Max load for LED dimming control. Comes with on/off/ press to dim, soft-start (2 second ramp-up/fade-down); Memory mode (return to last level), Set minimum dim mode. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control	42 x 24 x 24	1 to 6 gang wall plates		
SDD300BTAM/**BP**	**BLUETOOTH SMART DIMMER 300W / 250VA LED - GEN3 (Bell Press) CONTACTS.** As per SDD300BTAM + 2 additional cables for connecting any mechanical bell-press style mechanism and/or connecting to any system which provides a dry contact output for direct actuation of the dimmer switch. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control	42 x 24 x 24	1 to 6 gang wall plates		
SWL600BTAM	**BLUETOOTH SMART SWITCH 600W - GEN3** All features as per Smart Switch SWL350BT with 600 Watts of switching. Includes Tails not Terminals for wiring terminations Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control	42 x 24 x 24	Range of wall plates - max 6 gang plate		
SWL600BTAM/**BP**	**BLUETOOTH SMART SWITCH 600W WITH B.P.- GEN 3** (Bell Press) CONTACTS. As per SWL600BTAM + 2 additional cables for connecting any mechanical bell-press style mechanism and/or connecting to any system which provides a dry contact output for direct actuation of 600 Watt switch. Ideal for using device as an in-wall puck type of device. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control	42 x 24 x 24	Range of wall plates - max 6 gang plate		
SDD400SFI	**BLUETOOTH SMART DIMMER c/w SFI TECHNOLOGY FOR FLICKER FREE LED DIMMING WITH SAL's SFI LED DOWNLIGHTS** Only for use with SAI SFI LED downlight range - ***Eliminates ripple injection/ off peak hot water tone in NSW / QLD*** Dim to 1% output level - super smooth, super deep dimming Dimmer will NOT operate if not paried with SAL SFI copatiblae downlights Compact form factor allows for up to 6 Gang dimming wall plates Maximum of 22 SFi downlights per dimmer Comes with on/off/ press to dim, soft-start (2 second ramp-up/fade-down); Memory mode (return to last level), Set minimum dim mode. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control	42 x 24 x 24	1 to 6 gang wall plates

PC206BS/R/BTAM	**BLUETOOTH SMART BLIND AND SIGNAL CONTROLLER**. Used for 240volt control and/or Dry Contact output control of motorised blinds, curtains, awnings etc. Provides up,down, stop control for connected motors when wired correctly. **Ideal for motorised blinds, automated garage door control, automated gate control, low level interfacing to 3rd party systems such as security, Audio visual etc. Relays are normally open.** Can be used to operate TRIDONIC switchDIM and Osram pushDIM drivers, Interfacing to CASAMBI system. Capability to fine-tune control each relay with timing and sequences. **Physical INTERLOCKING button on board to prevent motor damage when switch activated.** Also includes PIXIE Bluetooth Booster for improving Bluetooth signal in PIXIE homes. On board buttons for testing, pairing and direct operation if needed. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	110 x 40 x 26 mm	Electrically safe device can be installed in a range of locations. Do not install inside metal enclosure. Not intended for in wall, behind switch plate installation.		
PC206DR/R/BTAM	**BLUETOOTH SMART DUAL RELAY CONTROLLER - Larger Load Controller**. 2 x 6 Amp relays to control larger loads directly. Not capable of volt free/dry contact operation - instead use PC206BS/R/BTAM Each relay is individually controllable and schedule-able. On board buttons for testing, pairing and direct operation if needed. Ideal for direct control of large loads as in-line device - such as outdoor weatherproof GPOs. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control. Also includes PIXIE Bluetooth Booster for improving Bluetooth signal in PIXIE homes. Relays are normally open.	110 x 40 x 26 mm	Electrically safe device can be installed in a range of locations. Do not install inside metal enclosure. Not intended for in wall, behind switch plate installation.

LT8915DIM/BT	**BLUETOOTH SMART LED STRIP CONTROLLER**. For smart control of any **SINGLE COLOUR 12v or 24v LED strips** **from any manufacturer**. Must select the correct driver and LED strip to match outputs. Smart way to control electrically separate LED loads as a group via the PIXIE and PIXIE PLUS apps. Separate input allows for **direct contro**l from mechanical momentary bell press for full dimming control. Also comes with **MEMORY** function dip-switch to return to previous state in the event of power outage. Also includes PIXIE Bluetooth Booster for improving Bluetooth signal in PIXIE homes. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	175 x 45 x 27	Electrically safe device can be installed in a range of locations. Do not install inside metal enclosure		
LT8915RGB/BT	**BLUETOOTH SMART LED RGB STRIP CONTROLLER**. For smart control of any **12v or 24v RGB LED strips** **from any manufacturer**. Must select the correct driver and LED strip to match outputs. Smart way to control electrically separate LED loads as a group via the PIXIE and PIXIE PLUS apps. 2 x separate input allows for **direct control** from mechanical momentary bell presses for full dimming control and colour control. Also comes with **MEMORY** function dip-switch to return to previous state in the event of power outage. Also includes PIXIE Bluetooth Booster for improving Bluetooth signal in PIXIE homes. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	175 x 45 x 27	Electrically safe device can be installed in a range of locations. Do not install inside metal enclosure		
FLP12V2M/NDL/SBT	**SMART LED STRIP KIT 15W 5K 2M.** Complete plug and play kit. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	N/A	Recommended to be installed in aluminium channel for operational longevity		
FLP12V2M/RGBBT	**SMART LED STRIP KIT 15W RGB 2M.** Complete plug and play kit. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	N/A	DISCONTINUED		
FLP12V2M/WW/SBT	**SMART LED STRIP KIT 15W 3K 2M.** Complete plug and play kit. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	N/A	Recommended to be installed in aluminium channel for operational longevity		
FLP12V5M/NDL/SBT	**SMART LED STRIP KIT 24W 5K 5M.** Complete plug and play kit. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	N/A	Recommended to be installed in aluminium channel for operational longevity		
FLP12V5M/RGBBT	**SMART LED STRIP KIT 24W RGB 5M.** Complete plug and play kit. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	N/A	Recommended to be installed in aluminium channel for operational longevity		
FLP12V5M/WW/SBT	**SMART LED STRIP KIT 24W 3K 5M.** Complete plug and play kit. Comes with Bluetooth mesh technology, 24hour/7 Day scheduling, Groups, Scene Control.	N/A	Recommended to be installed in aluminium channel for operational longevity
