PIXIE

Simply Swap for Smarts

Installing PIXIE smart double power points puts the smart convenience of Bluetooth® mesh into everything you plug-in, increasing the IQ of your PIXIE smart home.

With a range of four interchangeable stylish faceplates and tactile on/off buttons with LED indicators and, the super-special multipurpose button in the middle, the humble power point just got a lot smarter.

Swapping your existing power points you'll discover the front face is slightly larger than most Australian power points. This intentional design choice ensures complete coverage of any existing hole when swapping out traditional, dumb power points for a beautiful on-wall finish.

The MIGHTY Middle Multipurpose Button.

The middle button puts control of every PIXIE controlled device, group and scene right where you are. And if you change your mind, simply change what's under control to suit your needs using the PIXIE Apps.

Individual control and scheduling.

Each socket can be controlled separately, manually and from the PIXIE apps with 24hr 7 day scheduling built-in to each too.

Safety & Power front of mind.

Lock-out manual operation with child-lock functionality and keep track of power consumption for each socket.
