

Smart Ceiling Fan Control with PIXIE

PLUG-IN module by Hunter Pacific International

Hunter Pacific International provides a plug-in* PIXIE module for a wide range of their indoor and outdoor DC powered, V2 ceiling fans.

Once installed home owners have complete smart control of ceiling fan speed, direction and light (if included) from the PIXIE mobile app, PIXIE Touch Panel (pictured here) and PIXIE wall control options.

*All Hunter Pacific Fans and modules must be installed by a licensed electrician

Radical 3 Matt Black with Koa Blades, with 18W CCT LED - RL335

6 & 9 Speed fan control with intuitive dial interface with animated fan graphic for simple user speed feedback.

Select between cool white, warm white and daylight on light enabled models and simply select your light level intensity using the slider.

Activate timers to maximise comfort whilst automatically minimising energy usage.

PIXIE TOUCH PANEL PART#:STP54BTAS

On Wall Control, Anywhere

Using the PIXIE Multifunction Rotary Controller, home owners control ceiling fan speed and light functions from a single, familiar rotary dial interface.

Homeowners can control their fans from multiple locations throughout their home.

PART#: SMFR/BTAS

More Control Options

Users control their fan's functions individually, and as groups including scheduling functions to maximise comfort.

Mobile App control from smart phones and tablets includes quick access widget control and voice control capability when enabled in the PIXIE PLUS App.

Simply fit the Hunter Pacific smart module (part#: PIXIEO98) into the ceiling fan receiver base to unlock the benefits of smart control for your Hunter Pacific DC ceiling fans.

LED Light - AIPL2670

Smart, Quiet, Energy Efficient DC Ceiling Fans

Ceiling fans are not all alike and Hunter Pacific designs to enhance modern decors and allow simple integration into the theme of each room in homes.

Then, by fitting the PIXIE smart module into the receiver base of DC V2 fans, users benefit from the modern convenience of smart control, coupled with decades of engineering excellence for Australian homes.

This collaboration demonstrates a commitment to Australian designed products with world-class capabilities for Australian homes.

Your Same Smart Home, Just Cooler

Activating SLEEP MODE allows home owners to go to sleep with the fan at one speed at wake up with the fan at another, automatically.

No more waking up in the middle of the night to turn the fan down or off. PIXIE gives homeowners total control of timing and target speed.

Choose Fans Only

Some homeowners want to experience the modern convenience of smart fans but don't need a fully smart home.

No problem, simply install the PIXIE module into the DC fan receiver base, download the PIXIE App and get connected to the installed fans.

There's no need for any other PIXIE devices.

Of course, its easy to grow into a PIXIE smart home later if desired by adding more PIXIE devices.
