PIXIE Gateway Gen3

This device is a bridge between the internet and the PIXIE Bluetooth mesh inside the home, introducing additional features and functionality such as out of home control and voice control capabilities. The Gen3 version introduces a LAN / RJ45 port for hard wired connections in addition to Wireless (2.4GHz) connectivity. The PIXIE Gateway Gen3 works with the PIXIE system and needs the free PIXIE Plus app.

Features

- Plug and play device with necessary AC adaptor included
- Choose between wireless or wired connection to local network
- PIXIE Connected Home Cloud for backup of PIXIE Home configuration
- Out of home control capabilities for the PIXIE smart home
- Integrate with voice assistants and other Cloud services and devices
- Schedule scenes, (as well as groups and devices as per the PIXIE App)
- PIXIE Gateway is an OPTIONAL device and is only needed if out-of-home control, scene scheduling or voice controls is desired.
