

Garage Door & Gate Controller

Garage Door and Gate Controller

Controlling a huge range of Garage Doors and automatic gates in Australia, using the PIXIE Garage Door and Gate Controller is the smartest decision you can make to increase your comfort, convenience and security at home.

With the inclusion of the sensor attached to your garage door and gates, you can now be confident when your doors and gates are opened and closed – and be notified the moment it happens.

Once you've upgraded to smart Garage Door and gate control, you'll never want to live without it again.

3 Different types of sensors for doors and gates available

Works with almost all Garage doors & gates in Australia!

Control up to 2 Garage doors per controller

24 hour, 7 day scheduling built-in

Built-in PIXIE Booster functionality

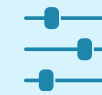

Garage Door Control Your Way

You can still use your existing remote control and now also use your mobile device app, Apple Watch™, and voice too.

Any Garage Door

Any garage door with a dry contact /voltage free (key-switch input) is controllable so you are free to choose a cost effective solution and add PIXIE.

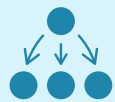

Delivery & Pet Mode + Custom Modes

Choose how much the door opens, and how long to wait until it automatically closes again, with mobile notifications to confirm closure.

Smart Home Interactions

Prepare your PIXIE smart home for arrival or departure automatically when you open and close your door, based on days and times.

Control Multiple Doors

Each controller is capable of controlling 2 doors, and if you need more simply add more controllers, give them a name and control at will

No Wi-Fi or Internet Needed

PIXIE's Bluetooth mesh technology ensures you are always in control when at home no matter the state of your home network or your internet.

Voice Control

Control your garage door with your voice using your favourite voice assistant – Google Home, Amazon Alexa or SIRI – You are free to choose.

Decide Who has Control

Define who can control what and when – whether at home only or remote control access too – its under your control and updates instantly.

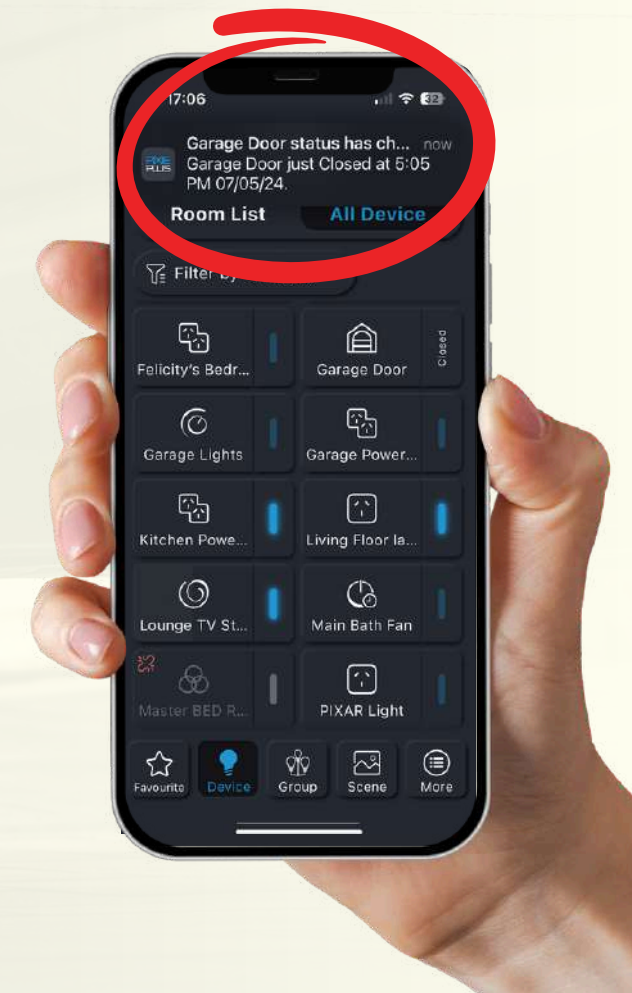

On Wall Control Anywhere at Home

Using a PIXIE Multifunction Controller (inc. battery versions), installed on a wall plate you have full garage door control from a simple button.

Voice Pin Code

When using Google Home, you get the additional security benefits of defining a PIN CODE needed for door operation for your peace of mind.

The PIXIE Garage Door and Gate Controller (C206GD/R/BTAM)

Works with both the SAL PIXIE and PIXIE PLUS Apps for direct OPEN STOP CLOSE control and in-App door status.

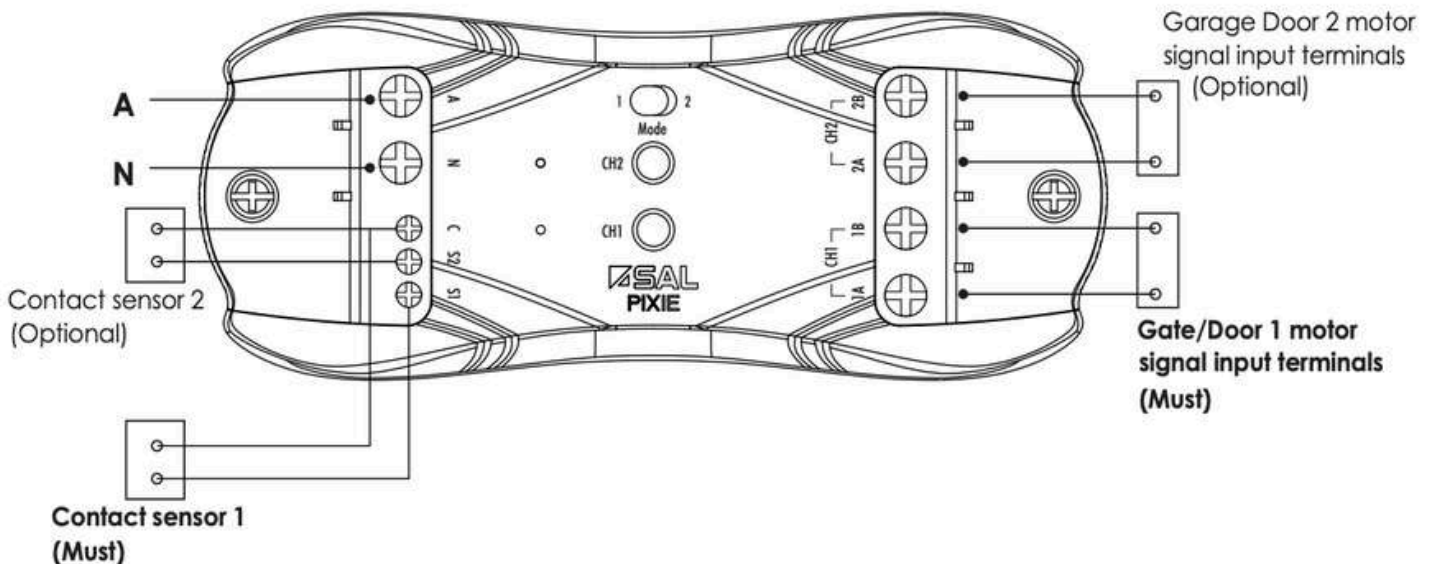

With the addition of the PIXIE Gateway and free PIXIE PLUS App, push notifications and internet enabled benefits are unlocked too.

ROLLER DOOR CONTACT SENSOR

CSR41BTP

- Contact Mode: Normally closed (N.C.)
- Operation Gap: >40mm
- Operation Voltage: <100V DC
- Operation Current: <500mA
- Reed Switch Dimension: L106 * W48 * H10 mm
- Magnet Dimension: L88 * W20 * H21 mm
- Cable Length: 650mm
- Installation Method: Surface mounted

For garage door and gate status functionality, including push notifications to mobile devices, it's necessary to install the roller door contact sensor (CSR41BTP) and have it connected to the PIXIE garage door and gate controller.

Using the PIXIE Remote Control Button (SMC3BTAS), provides simple in-car control of the garage door and gates. Replaceable batteries and simple operation can perform OPEN STOP CLOSE functionality when within Bluetooth Mesh range of the home.
