

# Houses of Worship

## Why use PIXIE for this application

As multi-use worship spaces host a variety of activities, managing lighting and energy costs becomes effortless with a PIXIE automation solution. PIXIE's flexible control options allow easy adjustment for different needs, ensuring optimal outcomes while staying within budget.

## Outcome Benefits

### Efficient Lighting, Smarter Spending

Combining just a few products from PIXIE for lighting control and energy management keeps installation costs low.

### No Special Wiring Needed Saves Money

No extra cables, no learning curve with a quick, low-cost install approach.

### App Control + Simple User Access

Give multiple users easy access to manage lighting, meet community guidelines, and cut energy use with effortless operation.

## Suggested Product Solutions

### Trouble Free Schedules & Light Switching

- Control indoor & outdoor lights
- Create schedules for anything & everything

### Remote Access Control and Monitoring

- Monitor & control from anywhere.
- Swap between locations from a single mobile App.

### Audio Visual, Lighting, Fans all Integrated

- Multiple electrical and AV type system components can be connected and controlled to allow focus on worship and not technology.

## PIXIE APPS - VENUES MADE SIMPLE

### • PIXIE Apps

PIXIE Apps are simple to use for system setup, future additions and operational setting adjustments, with intuitive, fast and secure apps.

### • Multiple Users Security

Easily add or remove control-only users and fine-tune what they can access—including on-site-access-only options.

### • Room for Expansion

Need more lighting or additional spaces (or locations) added to your system? No problem—PIXIE grows with your smart space portfolio.
