

# Industrial Units Warehouses

## Why use PIXIE for this application

PIXIE simplifies energy management and lighting control for Aussie industrial units and warehouses. Streamline operations without sacrificing performance in large or high-traffic spaces with capabilities for all lighting control protocols like DALI2 and 0-10v analogue.

## Outcome Benefits

### Building Code Compliance (BCA)

Combining just a few products from PIXIE for lighting control and energy management helps meet code compliance.

### No Special Wiring Needed Saves Money

No extra cables, no learning curve with a quick, low-cost install approach.

### On Wall Control and App Control

With PIXIE Apps, you're in control—and there's always a wall button for lights and devices. No PC or tech skills needed.

## Suggested Product Solutions

### Trouble Free Wireless Control & Schedules

- Create schedules for anything & everything
- PIXIE mesh boosters extended system range easily

### Remote Door Access, Notifications and Security

- Securely operate your industrial unit roller doors with Push Notifications when doors operated.

### Not Just Lights. Not Only the Warehouse.

- PIXIE works with motorised blinds, curtains, and sensors to meet more sophisticated requirements.
- Add the office spaces to boost energy savings.

## PIXIE APPS - CONTROL MADE SIMPLE

### • PIXIE Apps

PIXIE Apps are simple to use for system setup, future additions and operational setting adjustments, with intuitive, fast and secure apps.

### • Multiple Users Security

Easily add or remove control-only users and fine-tune what they can access—including on-site-access-only options.

### • Room for Expansion

Need more lighting or additional spaces (or locations) added to your system? No problem—PIXIE grows with your smart space portfolio.

## Typical Products for Smart Warehouses

- PIXIE Door Controller - PC206GD/R/BTAM
- PIXIE Smart Switch - SWL600BTAM
- PIXIE Dual Relay - PC206DR/R/BTAM
- PIXIE 0-10v Dimmer - PC152/R/BTAM
- PIXIE Gateway - SGW3BTAM
- PIXIE Touch Panel - STP54BTAS

## PIXIE for Commercial Spaces

PIXIE uses Bluetooth Mesh to deliver advanced control without the wiring and labour of traditional systems. Easy for sparkies to install, with smart mechs and app control that match top-tier automation—minus the complexity. For industrial units PIXIE offers conditional logic, often necessary for multi-access spaces to ensure safe ingress and egress conditions.
