PIXIE WEATHER PROOF BOX

Bring smart control to your garden lights and pool equipment by installing a PIXIE smart power point (part#: SPO23BTAM) inside this IP66 weatherproof enclosure.

Features

- IP66 rated when clamped closed with provided on-board clamp mechanisms
- Allows flex and plug to be connected AND cover to be clamped and locked closed to maintain IP66 rating.
- Multiple conduit entry points, drain points and rear knockouts as needed.
- Padlock slot for locking
- Suitable for most manufacturers power points AND PIXIE Smart power points.

Important Considerations

Please close the lid and secure the latches after installation, to achieve full IP66 protection.

Please seal the gap between the box and mounting surface, to ensure the designated IP ratings is maintained.

Do not expose the connected device to water with the lid open.
