

✓ Bluetooth Mesh runs in-home control. No internet needed except for voice.

✓ PIXIE Gateway adds internet, out-of-home control and voice integration.

✓ PIXIE Cloud (Australia-hosted) holds Accounts, Homes, schedules and integrations.

PIXIE PLUS Account
CLOUD-STORED RECORD

Your single login that holds the master record of every PIXIE Home, user and configuration.

STORES

- All PIXIE Homes
- User authorisations
- Linked Gateways
- Voice assistant links

A 'Home'
PHYSICAL + VIRTUAL

A physical location and a virtual collection of devices, scenes and schedules linked to a single Gateway.

INCLUDES

- Devices and groups
- Scenes and names
- Schedules
- A single Gateway link

PIXIE Gateway
HARDWARE BRIDGE

The bridge between in-home Bluetooth Mesh and PIXIE Cloud. One Gateway per Home.

MANAGES

- Internet to BT Mesh bridge
- Local copy of Home data
- Time clock
- PIXIE Cloud sync

PIXIE Devices
MASTER + SECONDARY

Physical devices that control electrical loads in the home via Bluetooth Mesh.

STORE

- Schedules
- Groups and scenes
- Physical load control
- Up to 128 Master per Gateway

PIXIE PLUS App
THE CONTROLLER

Used to set up, manage and operate every part of the PIXIE system.

USED FOR

- Account creation
- Device discovery, grouping
- Scenes, schedules, firmware
- User authorisation

RESILIENCE

Lose your phone or Gateway? Install a replacement Gateway and the PIXIE PLUS app on a new device. Account and Home data restores from PIXIE Cloud.
